

**Self-eSTEM!**<sup>™</sup>

Exponentially promoting Science, Technology, Engineering & Mathematics

Dear Parents/Guardians and Corporate/Community Partners,

While all of our lives have completely changed due to COVID-19 and the “shelter in place” order, we here at Self-eSTEM have been working (from home) diligently to provide ways to support our participants and families! Circumstances have led us to alter the way many of us have traditionally seen and practiced education. However, this doesn’t mean that learning needs to stop. In fact, Self-eSTEM sees this as a way to get our participants even more motivated to be a part of the change we wish to see in this world.

Self-eSTEM is committed to continuing to support our participants throughout the duration of this shelter in place by providing enriching, and creative virtual STEM activities that you can do with your child(ren) at home.

As a community, we will make every effort to provide you with additional resources we come across that can help to assist you and your family. We encourage you all to share as well.

Times are certainly challenging right now. We can come out of it together if we continue to work and build as a community. Self-eSTEM would like to acknowledge you all for doing your best to cope and sustain. We promise to continue to use STEM as a way to engage the girls, in such a way to support their future. Please check emails and our News & Events tab via our website for future events and updates.

We hope that all of our Self-eSTEM families remain safe and well.

Sincerely,

Adamaka Ajaelo, MBA  
Executive Director & Founder, Self-eSTEM
